

FLYCAM MINI

Featuring

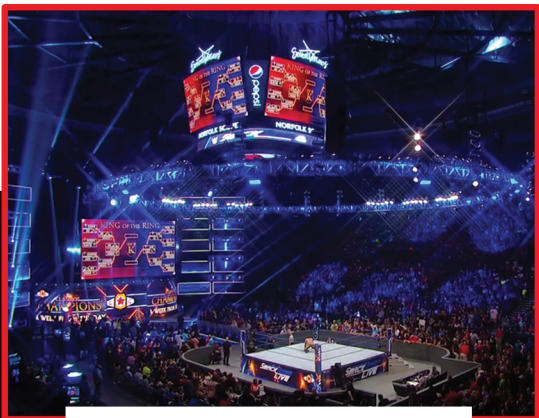

3-Axis Gyro Stabilized Head

**Standard Setup Features
Sony P1 & Fujinon 5.5-12 Zoom**

RF Operation & Paint Control

Speeds Up to 20mph

FlyCam Mini is the **NEW**, 2-point, easy to rig, battery-powered, addition to the FlyCam family. Operating on a coordinated, private, licensed band, the RF wireless signal has stable connectivity to distances up to 1000 feet! **The Mini** easily rigs to existing structures, lifts, and trees. It's perfect for productions with limited rig time and footprint constraints.

Self Propelled

The Mini is entirely battery powered & RF driven, giving the client more options for out of the box setups.

Quick Rigging

Easily attaches to existing structures, scissor lifts, and trees via redundant support lines.
